

Headquartered in Tempe, Arizona, NextCare is one of the nation's largest privately owned providers of urgent care, virtual care and occupational health services.

NextCare operates over 170+ clinics nationwide, and represents 3 brands across 12 states: Access Medical Centers (OK), Michigan Urgent Care (MI), NextCare Urgent Care (AZ, CO, KS, MO, NC, NE, NM, Abilene, Austin, Beeville, Dallas, Houston, Port Lavaca, Rockport, San Antonio, Victoria & Waco, TX).

NextCare was founded in 1993, and places an emphasis on customer service to ensure patients experience the highest level of care from reception to recovery. The company's unique differentiators include the NextCare Anywhere application that allows patients to book visits, access medical records & pay their bills, online check-in, a Customer Service Center, discount care programs for individuals, families and employers. NextCare specializes in compassionate care delivered in a technologically sophisticated healthcare environment.

According to reports from the National Center for Healthcare Statistics, up to 80 percent of emergency room visits are for issues that could have been resolved in an urgent care environment. NextCare is poised to be a leader in high access healthcare for millions of Americans who would otherwise be unable to access affordable, high-quality health care.

NextCare is a one-stop shop and covers all types of visits for patients of all ages – from ear infections to ankle sprains to flu shots. The wait time for appointments is minimal and most clinics offer in-house labs and X-rays, which help patients to receive a prompt diagnosis and quality care.

Most NextCare clinics are open seven days a week with extended hours (several are open until midnight). Patients can seek assistance at time that their primary care physician might not be available. NextCare tailors its services to the needs of the individual communities served. The company hosts free health and wellness clinics and provides medical support for large-scale community events.
